PROFESSIONAL SUMMARY

Full Stack Engineer with production experience delivering React/Node.js solutions and hands-on experience with Java, Spring Boot, and cloud technologies at Accenture. Architected a zero-cost serverless platform serving 2,000+ users and engineered an automation tool reducing manual processing time by 87%.

EDUCATION

Indian Institute of Technology Bhubaneswar

Bachelor of Technology in Computer Science & Engineering; CGPA: 7.47/10

Bhubaneswar, India

2020 – 2024

Board of Intermediate Education, A.P

Intermediate (12th Standard); 94.2%

Andhra Pradesh

2018 – 2020

EXPERIENCE

Advanced App Engineering

Accenture (Client: Intuit)

Oct 2024 – Present

Bengaluru, India

- Automation Engineering:** Independently built a UI-based automation extension for the MyOSP platform to enable bulk worker lifecycle updates (onboarding, termination, rehires), bypassing budget and resource constraints for a 9,000-worker ecosystem. Delivered in **4 days** vs. a projected **10-day** engineering cycle using a non-intrusive UI-layer approach.
- Operational Efficiency:** Reduced manual processing time from 2 minutes to **15 seconds (87% reduction)** per worker, automating 300+ monthly requests and saving significant man-hours for the business team.
- Platform Reliability:** Responsible for production validation and defect management for the MyOSP platform, coordinating with engineering and operations teams to resolve issues impacting a 9,000-worker ecosystem.
- Quality Assurance:** Orchestrated release testing and UI validation during resource gaps, ensuring zero-defect deployments for critical financial service updates.

Advanced App Engineering Intern

Accenture ATCI

June 2023 – July 2023

Pune, India

- Implemented incident response and access control measures for AWS and Oracle Cloud environments, aligning with industry security best practices.
- Collaborated with security architects to perform vulnerability management and audit logging for enterprise cloud infrastructure.

PROJECTS

Prayanam Automation | Google Apps Script, Python, Serverless

Jan 2024 – Present

- System Architecture:** Architected an event-driven, serverless microservice capable of scaling to thousands of concurrent requests for a ride-matching ecosystem for a **2,000+ member community** in Anantapur, facilitating seamless carpooling without manual intervention.
- Operational Efficiency:** Reduced ride posting latency by **60% (5 mins to <2 mins)** by replacing manual workflows with automated form validation and WhatsApp integration.
- Cost Optimization:** Engineered the entire solution to operate at **Rs. 0 monthly infrastructure cost** while processing **450+ monthly requests** with 100% data consistency.

Dealership Review Portal | React, Node.js, MongoDB, Docker, IBM Cloud

- Developed a full-stack dealership review platform with role-based access control (RBAC) for admins and users.
- Integrated IBM Watson for **sentiment analysis** of user reviews and containerized the microservice using **Docker** for CI/CD deployment on IBM Cloud Code Engine.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL (Postgres, Oracle), HTML/CSS, PHP, Java

Frameworks/Libraries: ReactJS, NodeJS, ExpressJS, Spring Boot, Hibernate

Cloud & Tools: AWS, Oracle Cloud (OCI), Docker, Git, RAG Implementation

Concepts: Object-Oriented Design (OOD), Data Structures & Algorithms, DBMS, Agile Methodologies, Cloud Security

CERTIFICATIONS

IBM Full Stack Software Developer (2025) | **Google Data Analytics Professional** (2024)
Oracle Cloud Security Professional (2023) | **OCI Data Science Professional** (2023)

ADDITIONAL

NCC: C-Certificate (2023)
Languages: English (Fluent), Hindi (Fluent), Telugu (Native), Japanese (Basic)
